## Oppose Port Ambrose, an Offshore Liquefied Natural Gas Facility

Petition by: The City of Long Beach

To be delivered to: NYS Governor Andrew Cuomo

## BACKGROUND

Liberty Natural Gas (Liberty LNG) is proposing to build 'Port Ambrose,' a deep-water port that would import liquefied natural gas to the NY/NJ region.

This proposal is concerning for several reasons:

- LNG tankers and facilities pose serious health, safety and security risks;
- LNG has the potential to exacerbate current climate change trends, negatively affect air and water quality and the regional ecology including our beaches;
- Port Ambrose has the potential to become an export facility, thus increasing demand for “fracking” in our region, a practice known to threaten our air and water quality;
- Port Ambrose will not demonstrate a real and long term economic benefit and poses a threat to our small business community reliant on our natural assets.
